IN THE SPECIFICATION

Please amend Page 2̷1̷ 20, Lines 14 to 21, as follows:

A block within a current field of the received video information is first selected (step 402)

and a simple enhancement, in this case sample rate conversion, is performed. The block is also

enhanced (step 403) utilizing each of a plurality of selected candidate enhancement vectors

consisting one or more enhancement algorithms employed jointly or individually, such as frequency

peaking and luminance transient improvement.
